

GLOBAL ADVANCED MANAGEMENT PROGRAMME

**Expanding Markets by
Leveraging Emerging
Technologies**

**8th – 14th October 2023
Silicon Valley, USA**

Programme Background

The global disruption of the past couple of years has changed business and business leadership. While a few businesses are scrambling to scale up and diversify to meet the explosion of demand for all things digital and home-delivered, most businesses are striving to rebuild under the cloud of supply chain disruptions and unpredictable lockdowns. It is a new world with a new set of competitive challenges and advantages. There is a great urgency about adapting to new business models, new competitors, new customer needs, new social priorities, new policies, and new regulations. Business leaders are required to attend to transformation across products, processes, personnel, structures, systems, relationships, supply chain, and market access in order to keep up with frequent change and navigate radical uncertainty. AIMA's Global Advanced Management Programme (GAMP) is designed to help business leaders appreciate the emerging trends and work out the most appropriate open innovation strategies taught at UC Berkeley to stay ahead of the pack.

Programme Structure

Module 01

Visit to World class Companies

Immersive visits with first-hand experience of some of the world's most innovative companies that have made Silicon Valley a hub of cutting-edge innovation and futuristic business models.

Module 02

Interaction with Industry Experts

Closed group interactions with some of the most eminent thought leaders, futurists and researchers from both industry and the academia; providing unique insights for current and future business strategies.

Module 03

Exposure to Managerial Research

Deep dive into well researched and sustainable business models from the leading think tanks and academic bodies. These are designed to trigger, reflect and implement researched learnings in everyday managerial practices.

Module 04

Business Model Innovation

All businesses place a high priority on innovation because new ideas, products and processes can translate directly to higher profits and corporate growth. Many innovations and best products fail without the right business model. The session discusses the increasing role of innovation in business models and why some business models fail and some succeed.

Module 05

Open Innovation

Open Innovation is increasingly being embraced by new industries and existing business as a key tool to navigate, sustain and grow an enterprise in the changing landscape. Innovations stimulate growth and result in prosperity but most fail but yet companies that don't innovate die on the vine. This part of the programme focuses on open innovation concepts, theory and practice. Managing innovation pertains equally to both manufacturing and services and translates directly into growth in new businesses, and better profits in existing businesses.

Programme Objectives

- Identify opportunities for profitable growth.
- Respond and adapt to the challenges in the changing landscape due to rapid global economic trends.
- Examine the latest concepts, ideas and tools to help them align their business practices with global economic developments and conditions.
- Learn to build sustainable and innovative business models.

Learning Approach

Bulk of the learning will take place via visits to companies and face-to-face discussions with senior executives (often including the CEO). By design, these visits are not meant to be "industrial tourism." Rather, each visit will allow us to go deeper into the opportunities and challenges being faced by each company as it tries to stay ahead in the technology, innovation, and entrepreneurship game. It is these face-to-face discussions that will form the primary intellectual raw material for the participants' learning. Professor Darwin will help the participants reflect on these discussions and derive lessons that may be applicable to their own companies.

Programme Certificate

Upon the successful completion of the programme, participants will be conferred a Global Advanced Management Programme Certificate awarded by All India Management Association.

Proposed Programme Schedule

(This is an illustrative programme. The speakers / company visits are subject to confirmation and could be same or similar)

Sunday, October 8, 2023

Ice Breaking Session

Solomon Darwin

Executive Director, Garwood Center for Corporate Innovation, Haas School of Business, University of California, Berkeley

Solomon Darwin has broad leadership experience in corporate management and academia. He is an international speaker recognized by peers, executives, and students with numerous awards for his innovative leadership and passion for teaching. He inspires students from both business and engineering disciplines in his courses for open innovation, business models, smart cities, scalable smart villages, and business models for emerging economies. He is also known as the father of the Smart Village Movement.

As an expert in “open innovation” and “open business models,” he is an adviser to senior executives of multinationals and government leaders in the emerging world. The list includes large global brands and government entities in Europe, China, Russia, India, and Latin America. He directs and moderates international innovation conferences and forums, and chairs quarterly Chief Innovation Officer round tables in Silicon Valley.

Before joining Berkeley Haas in 2005, he was an Associate Professor for nine years at the University of Southern California. His progressive corporate leadership experience covers a span of 14 years as a Senior Executive Officer at Bank of America, First Interstate Bank, and Glendale Federal Bank, and Motorola.

During summers, Darwin regularly teaches in executive programs at prominent international universities and institutions. He has conducted workshops and programs in over 18 countries. He also serves as an honorary professor at several universities in Europe, China, South Korea, and India. His current projects, “Building Scalable Smart Villages” and “The Rebuilding India Initiative” were commissioned by the government of India.

His academic achievements include: BA (San Francisco State University); MBA (Golden Gate University); MCCP (Harvard University); and holds two honorary doctorates.
