51st National Management Convention

AIMA's flagship event - is a mega two-day programme that addresses a topical theme of national importance every year. The Convention focuses on current events; and is addressed by eminent speakers, including Ministers, CEOs and Thought Leaders from different spheres of life, who share their views with participants through interactive sessions.

AIMA's 51st National Management Convention is being organised on 11-12 September 2024 at Hotel Taj Palace, New Delhi. The theme for the Convention this year is 'India's ascent: Navigating global uncertainty'. New India needs a new dream – a dream of being a country with high standards of living for every Indian, a dream of being an evolved country that offers the world new models of economy, democracy, governance, technology and culture.

About Convention theme

India's ascent: Navigating global uncertainty

Indian economy has attained the critical mass to sustain a fairly high rate of growth for the next few decades. It has been steadily climbing the ranks of the largest economies in the world and it is poised to become the third-largest economy by 2030. India's focus on industrialization, digitalisation and green technologies is creating new growth opportunities. However, Indian economy is still vulnerable to shocks, as witnessed during covid disruption and war-generated inflation spike, and its growth momentum is susceptible to compounding global uncertainty. The aggravation of geopolitical rivalries and worsening economic balkanisation is affecting national choices in trade and access to technology and investment. While the rearrangement of international partnerships and alliances has opened vast opportunities for India to profit from the evolving supply chains, capital flows and technology sharing arrangements, the volatility of alliances and terms of partnerships impose significant uncertainty on India's prospects. The growing conditionality of market access because of geopolitics and weaponisation of environmental and governance differences can also constrain India's ability to exploit its full economic potential. Climatic events also pose a significant risk to India's growth resilience and India is under pressure to balance fast growth with sustainability. While India's ascent is guaranteed by the size of its population and economy, and its centrality to the new geopolitics, the country's policy and business leaders need to find ways to navigate the global uncertainty that can affect the pace and extent of the ascent.

ABOUT AIMA

The All India Management Association (AIMA) is the Voice of India's Leaders and Managers, and the apex body for management in India with over 38000 members and close to 6000 corporate / institutional members through 68 Local Management Associations affiliated to it. AIMA was formed over 60 years ago and is a non-lobbying, not for profit organisation. It works closely with industry, Government, academia and students, to further the cause of the management profession in India; and is represented on a number of policy making bodies of the Government of India and national associations. AIMA offers various services in the areas of testing, distance education, skill development & training, research, publications, executive education and management development programmes – both in the physical and virtual mode. In addition, AIMA brings to the Indian managers, the best management practices and techniques through numerous foreign collaborations with professional bodies and institutions.
