## About AIMA

The All India Management Association (AIMA) is the apex body for management in India with over 38000 members and close to 6000 corporate /institutional members through 67 Local Management Associations affiliated to it. AIMA was formed over 60 years ago and is a non-lobbying, not for profit organisation. It works closely with industry, Government, academia and students, to further the cause of the management profession in India; and is represented on a number of policy making bodies of the Government of India and national associations. AIMA offers various services in the areas of testing, distance education, skill development & training, research, publications, executive education and management development programmes – both in the physical and virtual mode. In addition, AIMA brings to the Indian managers, the best management practices and techniques through numerous foreign collaborations with professional bodies and institutions.

## Context

The virtues of the public sector have been missed during the covid, economic and security crises of the past two years. The breakdown of the usual normal has necessitated recourse to national capacity and resilience and also responsiveness to policy priorities and social responsibilities. It has been a reminder of the need for both a key role for the public sector and a radical transformation of the way the public sector functions. It is also an opportunity to step back and reconsider the role and scope for the public sector in the changed dynamics of the world. Instead of being carried as a burden from the past, the public sector must be reimagined as the catalyst of the future technologies, industries and investment.
