Re-envisioning Business and Re-wiring Business in Age of AI

Best practices for success journey of CIOs in age of AI

In collaboration with Computer Science and Engineering Department, IIT Bombay

Introduction

With rapid advancements in artificial intelligence (AI) and technology, Indian businesses are experiencing a seismic shift. Over 80% of organizations believe AI will significantly impact their industry in the next 5 years. However, only a few IT leaders are fully prepared to harness their potential, offering senior business managers and digital officers a unique opportunity to gain a competitive edge through skills and knowledge in this transformative era.

Deliberation for CIOs and CXOs:
For career strategy point of view, what are the new opportunities and how shall I prepared myself to leverage AI for my career growth.

Key Takeaways

- Expert's views on opportunities and guidance for new career opportunities

- Networking opportunities at rich platform of AIMA digital transformation course with senior IIT professors, all four batch participants and industry experts.

- Interaction with faculty of the course in person

- Take rich memory of excellent academic and R&D eco environment of IIT Bombay

Saturday, 30th Sept 2023
